“Your Leader in Backyard Vacation Fun”

## **CLOSING THE ABOVE GROUND POOL**

1. Balance PH, alkalinity, & calcium hardness.
2. Add Winter Kit 12.
3. Run pump 1-2 hours.
4. Turn off the pump.
5. Remove skimmer basket and thread Gizzmo into the skimmer hole.
6. Remove the directional eyeball fitting and insert a winter plug into the hole.
7. Move the multi-port handle to “WINTER”.
8. Remove the flexible hoses and store them indoors.

**(or)**

Drain the PVC pipe by opening the unions before the pump and after the return.

9. Remove the plug from the front of the pump.
10. Remove the drain cap from the bottom of the filter tank.
11. Remove the plug from the bottom of the chlorinator.
12. Remove the plug from the heater.
13. Remove any other plugs from the pump / filter area not mentioned above.
14. Place the plugs and drain cap in the pump basket until next spring.
15. Put winter cover on the pool.
